TECHNICAL FEATURES

Vitrified cast-iron burners with brass double-ring burner cap that provide a diffused flame ideal for uniform cooking due to an increased heat distribution at the bottom of the pot, even large-diameter pots. Valve taps with safety thermocouple. Pilot flame for burner ignition. Thick vitrified cast-iron grids and removable and washable basins under the burners. Venturi Tube with innovative geometry that ensures an optimal combustion efficiency, reducing the possibility of gas nozzle occlusion. Ergonomic and athermic adjustment knobs.

Static gas oven of 7.7 kW, heated by stainless steel burner with stabilized flame, piezo ignition with thermocouple and pilot flame. Cooking temperature regulation from 100° to 340°C by thermostatic tap. Oven capacity: 3 GN2/1 trays. Three-position and removable rack guides for a perfect cleaning. The oven cooking chamber is entirely made of 1 mm thick AISI 304 stainless steel. Insulated double-walled oven door with Heavy Duty hinges and rubber gasket to ensure perfect closing.
